# SMART ANTI-COLLISION BAR

## ACOUSTIC SIGNALIZATION

The barrier serves as a signaling warning towards a possible collision of material handling equipment (MHE) with automatic gates or low-ceiling / passage. The smart anti-collision bar warns the MHE driver by an optoacoustic signal on an excessive load.

### TECHNICAL DATA

- PLUG and PLAY;
- stable and impact-resistant coating (UV-resistant);
- 2 types of charging: battery (operation for 1 charge up to 5 year), power supply (12 VDC);
- working temperature of the barrier from + 5 °C to + 50 °C;
- intelligent impact sensor - resistant to false alarms eg. wind draft (sensitivity selectability);
- siren 110 dB lasting for 7 seconds;

### POSSIBLE USE

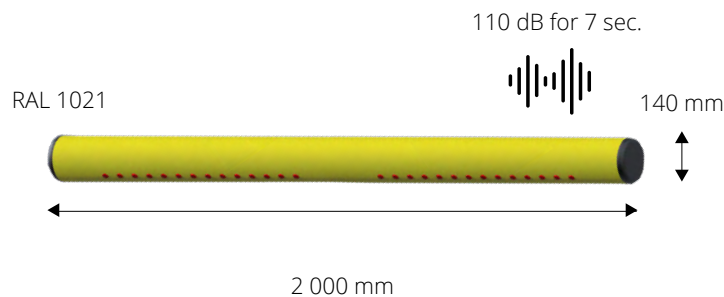

industrial door

lowered conveyor

horizontal / vertical
